Altair Example

```
library(reticulate)

python <- "~/.virtualenvs/python-3.7.7-venv/bin/python"
if (file.exists(python))
  use_python(python, required = TRUE)
```

```
import altair as alt
from vega_datasets import data

source = data.movies.url

alt.Chart(source).mark_bar().encode(
    alt.X("IMDB_Rating:Q", bin=True),
    y='count()',
)
```
